

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Platinum World Portfolios - Asia Fund (the "Fund")

A sub-fund of Platinum World Portfolios Plc (the "Company")

Class A USD Accumulating (ISIN: IE00BYRGR522)

Objectives and Investment Policy

Investment Objective

The Fund aims to provide capital growth over the long-term (generally five to seven years) by investing 50% to 100% of its net asset value (at the time of investment) in undervalued securities of companies in the Asian Region (excluding Japan).

Investment Policies

- The Fund's investments in securities are limited to securities of companies in Asia (ex Japan), including securities of companies that are listed or traded outside Asia (ex Japan), but whose business is predominantly conducted in or focused on Asia (ex Japan).
- The Fund will invest primarily in equity and equity related securities that are listed or traded on regulated markets.
- The Fund's portfolio is expected to comprise approximately 25 to 150 securities that the investment manager believes to be undervalued.
- When undervalued securities cannot be identified, the Fund may invest in cash, deposits and similar instruments.
- The Fund may use financial derivative instruments (instruments that derive their value from other underlying instruments, e.g. futures, options, swaps) to increase returns and/or for the purpose of efficient portfolio management (e.g. to reduce risk exposure).
- The Fund may hold indirect short positions through the use of financial derivative instruments (primarily equity swap contracts).
- The Fund may be leveraged as a result of using financial derivative instruments (including for indirect short positions), but such leverage will not exceed 100% of its net asset value.

- The Fund's currency exposure may be managed through hedging instruments (e.g. foreign exchange forward contracts, swaps, "non deliverable" forwards and currency options) and/or cash foreign exchange trades. There is no guarantee that such currency hedging will be successful.

Fund Currency

The base currency of the Fund is the US Dollar.

The Fund does not seek to undertake share class currency hedging.

Distributions

The Fund does not propose to declare a distribution in respect of the shares and net income and capital gains arising will be accumulated and reflected in the net asset value per share.

Investment Horizon

Recommendation: The Fund may not be appropriate for investors who plan to withdraw their money in less than five years.

Subscription and Redemption

Investors can subscribe for or redeem shares on any day on which banks in Dublin, Ireland are open for business by submitting an application/redemption form to the Fund's administrator, State Street Fund Services (Ireland) Limited, by 3:00 pm (Irish time).

For more information about the Fund's investment policy, please refer to the Fund's prospectus, available at www.platinumworldportfolios.ie.

Risk and Reward Profile

The risk and reward indicator is a measure of the potential risk and returns of the Fund based on simulated historical data over the past five years. As the Fund has less than five years of history, simulated historical data based on a representative portfolio and benchmark was used to calculate to which category the Fund should be placed. Historical data may not be a reliable indicator for the future.

The lowest category, 1, does not mean a 'risk-free' investment. The risk and reward category shown is not guaranteed and may shift over time.

The Fund is in category 5 because it invests mainly in equity and equity related securities of companies. Such securities have historically been subject to significant price movements which may occur suddenly due to market or company specific factors.

The following risks, which are not adequately captured by the risk and reward indicator, are materially relevant to the Fund:

Emerging Markets risk: the risk of investing in countries with sovereign, political, economic, legal or market instability. In particular, investing in China A-Shares through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong

Stock Connect may expose the Fund to additional operational, regulatory and other risks as the program is new and novel in nature.

Liquidity risk: the Fund may not be able to buy or sell a security at the desired time or price or achieve its desired weighting in a security.

Portfolio currency risk: investing in assets denominated in a currency other than the Fund's base currency may cause losses resulting from exchange rate fluctuations.

Share class currency risk: shares in Classes E and G are denominated in EUR and GBP respectively. The net asset value per share and investment performance of those classes may be affected by changes in the exchange rate between the Fund's base currency (USD) and the denomination currency of the relevant share class. The Fund does not seek to undertake share class hedging for Classes E or G.

Derivatives risk: investments in derivatives may cause losses associated with changes in market conditions such as fluctuation in interest rates, equity prices or exchange rates. Changes in the value of a derivative instrument may not correlate exactly with the changes in the underlying asset. Derivative transactions may be highly volatile and can create investment leverage, which could cause the Fund to lose more than the amount of assets initially contributed to the transaction. As derivatives are customised instruments, the Fund may be unable to liquidate a derivative contract at a fair market price within a reasonable timeframe.

For a detailed description of risks, please refer to the Fund's prospectus, available at www.platinumworldportfolios.ie.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges that may be taken before or after you invest

Entry charge	0.25%
Exit charge	0.25%

These are the maximum charges that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year	
Ongoing charge	1.00%

Charges taken from the Fund under certain specific conditions

Performance fee	15% a year of the amount by which the Fund's return exceeds that of MSCI AC Asia ex-Japan Net Index in US\$. The return is after deduction of the Fund's ongoing charges, but before deduction of accrued performance fee, if any. If the Fund's return in a given year is less than that of MSCI AC Asia ex-Japan Net Index in US\$, the difference for that year will be carried forward and applied against the Fund's return in the subsequent year for the purpose of calculating a performance fee. The shortfall will be carried forward until a performance fee becomes payable.
-----------------	--

The **entry and exit charges** shown are maximum figures. In some cases, you might pay less - you can find this out from your financial advisor.

The entry and exit charges are an anti-dilution levy which is applied to subscriptions and redemptions to cover associated dealing costs.

As a result of the entry and exit charges, a charge of up to 0.50% may be payable when switching from the Fund to another sub-fund of the Company or from one share class to another share class of the Fund.

The **ongoing charges** figure shown here is an estimate as the investment manager has voluntarily committed to observe this cap and to absorb any costs that would otherwise cause it to be exceeded. This voluntary cap may be withdrawn or modified upon notice to shareholders.

The Fund's annual report will provide details on the actual charges taken from the Fund in the relevant financial year. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges, please refer to the Fund's prospectus, available at www.platinumworldportfolios.ie.

Past Performance

As at the date of this document there is insufficient data history to provide a useful indication of past performance.

The Fund was authorised by the Central Bank of Ireland on 16 October 2015. The class was created on 10 March 2017.
